

Hanging Turkey Roasting Rack

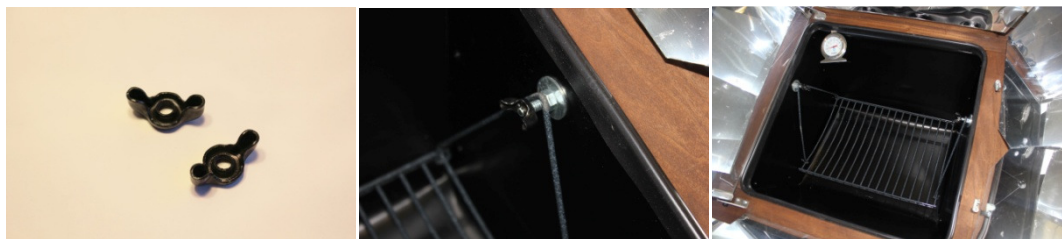

The Hanging Turkey Roasting Rack is designed to accommodate up to an 18 pound turkey in a baking bag. This Rack will replace the levelator tray when making turkeys or roasts in a baking bag.

Installation:

1. Remove the levelator by bending the upper lips toward the center and sliding them off the hanging bolts inside the **GLOBAL SUN OVEN®**.
2. When you receive the Hanging Turkey Roasting Rack the side hangers of the Rack will be folded down underneath the main rack. Turn the side hangers upward and hang them on the hanging bolts from which the levelator was removed.

3. Loosely thread the black wing nuts on to the ends of the hanging bolts. Do not tighten completely or the Hanging Turkey Roasting Rack will not swing freely.

Cleaning instructions:

The Hanging Turkey Roasting Rack should be washed in a sink with dishwashing soap. The Rack is NOT dishwasher safe.

The side hangers can be easily detached from the main rack for cleaning.
